### Corrigendum to Intensive glycemic control in younger and older U.S. adults with type 2 diabetes [JDC 31 (2017) 1299–1304]

Sarah S. Casagrande <sup>a,\*</sup>, Catherine C. Cowie <sup>b</sup>, Judith E. Fradkin <sup>b</sup>

<sup>a</sup> Social & Scientific Systems, Inc.

<sup>b</sup> National Institute of Diabetes and Digestive and Kidney Diseases

The authors regret that an error was made in the ratio of intensive treatment for adults by age. In the Abstract, the last sentence of the Results should read “The multivariate adjusted prevalence of intensive control was 64% higher in adults age  $\geq 75$  years (35.6%) compared to

adults 40–49 years (21.7%),” rather than 40% higher. This estimate is also mentioned in the second paragraph of the Discussion.

The authors would like to apologise for any inconvenience caused.
